

## Water Meter Replacement Coming to Your Home COUNTRY ISLES COMMUNITY IS FIRST BEGINNING JANUARY 3<sup>RD</sup>

Beginning **Tuesday, January 3, 2012**, water meters in residential communities in the Indian Trace portions of Weston will be systematically replaced, beginning with **Country Isles**, the oldest community (this area does not include Bonaventure). This replacement program, in conjunction with the City of Sunrise which supplies water to Weston, will be ongoing over the next two years. Over 7,700 meters will be replaced in the first year.

- **Why** - Industry standards dictate that meters be replaced approximately every 10+ years. After this time, meters can become inaccurate. Older units begin to deteriorate.
- **No Cost** - There is no cost to the home owner.
- **When** - Installers will work between the hours of 8:00AM-3:30PM weekdays.
- **Notification** – A doorhanger will be placed on your front door 24 hours prior. *If you do not receive a door hanger but your neighbor does, your meter does not need to be replaced as not every meter in a subdivision requires replacement.*
- **Who** – The installers will be from the company **Line-Tec**. They will have company vehicles and company ID.
- **Where** – Meters are not located in the same location at every residence, but are generally located in or near the front yard.

### Approximate first quarter year time schedule:

Country Isles	January into February
Tequesta	February into March
The Springs	Beginning in mid March

***The City will continually post updates of installation dates and locations on the city website or you can contact the Public Works Services Center at 954-385-2600.***
