Gas

All Broward County gas stations with at least 16 fueling positions (eight dispensers accessed from both sides), located within a half-mile of an interstate, turnpike or evacuation route, are required by law to install a pre-wired system allowing them to switch to emergency generator power to run pumps, cash registers and other critical equipment. The law does not require the station to be open for business in an emergency, nor does it require the station to have a permanent generator on-site. They can be pre-wired and rent a generator.
